

statement on the role of philosophy programs in higher - prepared originally under the title *the role of philosophy programs in higher education* by the american philosophical association's committee on the status and future of the profession, **philosophy of religion wikipedia** - philosophy of religion is the philosophical examination of the central themes and concepts involved in religious traditions these sorts of philosophical discussion are ancient and can be found in the earliest known manuscripts concerning philosophy the field is related to many other branches of philosophy including metaphysics epistemology and ethics, **right is the new left slate star codex** - my first reaction to this post was wow what a bad reason to change your attitudes my reaction upon reflection was to notice that i was a leftist neoliberal in my conservative bible belt high school and in my left wing liberal arts college i became more libertarian but also more culturally radical so no one could confuse me for one of those lew rockwell type conservative libertarians
